

Question 1

What was the key discovery made by the Houston Rockets NBA team through the analysis of video tracking data? 1 / 1 point

Three-point shots from outside the three-point line were not as effective as long-range two-point shots.

Raw data from games did not offer any valuable insights for improving gameplay.

Two-point dunks from inside the two-point zone and three-point shots from outside the three-point line provided the best opportunities for high scores.

Long-range two-point shots from inside the two-point zone were the most productive plays.

Correct

Correct! This is the key discovery made by the Houston Rockets through data analysis.

Question 2

What is one of the key advantages of using the Cloud for data scientists? 1 / 1 point

It requires the installation and configuration of tools locally.

It limits access to data, ensuring better security.

It is only accessible from specific devices.

It allows collaboration among multiple teams on the same data.

Correct

Correct! The Cloud facilitates collaboration by enabling multiple teams to access and work on the same data simultaneously.

Question 3

What is Hadoop primarily known for in the context of handling data? 1 / 1 point

Data encryption

Data analysis

Data visualization

Data storage

Correct

Correct! Hadoop is primarily known for its ability to analyze and process large volumes of data efficiently.
